## UA-R560F2 IP Camera Version History

### Firmware V1.02 2023-01-13

**Firmware V1.02 applies to the following UA-IP camera models:**

- UA-B580F3
- UA-R560F2
- UA-R580F2

**New:**

- Support for GeoVision DDNS server (GEO\_DDNS)

**Fixed:**

- Connection failure using the PPPoE IP address
- Issue of more image noise and a higher bitrate when 3D Noise Reduction is maximized
- Issue of Unknown Error message displayed on GV-Edge Recording Manager when connecting to the camera with accounts other than System Administrator

**Modified:**

- People and Vehicle Detection event alarm integrated on GV-VMS V18
- Audio decoding type set to G711U by default
- Special characters supported for the Sender field on the Email Configuration page of the Web interface

### Firmware V1.01 2022-06-20

**Firmware V1.01 applies to the following UA-IP camera models:**

- UA-B580F3
- UA-R560F2
- UA-R580F2

**New:**

- Support for Face Detection and Rare Sound Detection
- Support for Initialization function on UVS Device Utility (V1.0.2.06 or later) for setting the default passwords for several cameras at a time

**Fixed:**

- Issue of falsely displaying the camera's I/O device list on GV-VMS / GV-Control Center
- Issue of automatically adjusting the bitrate for static and dynamic scenes when the highest video quality is selected
- Issue of falsely displaying the connection failure message on UA-SNVR when the camera is connected to UA-SNVR via Private protocol and the incorrect username or password is entered
- RF format option removed and MP4 option set by default for recording download
