GV-LPR2812-DL Version History

Firmware V1.02 2025-11-10

New:

- Integration support for GV-Cloud Access Control
- Support for live view and playback on GV-Cloud Access Control via GV-Cloud Bridge Pro (V1.03 or later)
- Continuous LPR detection and recognition triggered by a one-time input signal
- Two-row license plate recognition support for Vietnam LPR engine
- Support for new engines: Latvia and Filipino

Fixed:

- Chances of device detection failure when using GV-IP Device Utility or ONVIF Device Manager (ODM)
- Issue with auto-focused image views, adjusted through GV-ASManager or GV-VMS, not being retained after device reboot
- Connection failure with GV-ASManager when certain symbols are used in the password
- Issue with configured motion detection areas not being retained after device reboot
- Issue with database and system error

Modified:

- Memory allocation enhanced
- Hungarian engine enhanced for recognition of 7-digit license plate numbers
