

GV-RNVR2560G-N Version History

Firmware V1.01 2025-03-13

New:

- Support for 802.1x authentication
- Support for the Preview Settings On Lock Screen option for enabling or disabling the live view display after system startup
- Support for the Illegal Login Lockout option for preventing login after a certain number of failed attempts
- Support for fisheye dewarping for playback (image resolution must be 1:1)
- Support for GV-VPN
- Support for the Czech interface

Fixed:

- Failure to receive audio from GV-TMS8800
- Failure to connect GV-GFER6900, causing unexpected reboots on the standalone device

Modified:

- Start Wizard now supported
- 5 and 10 second post-recording options added for Motion settings
- PIR, LPR and LPD functions removed
- Record Schedule for normal, motion and I/O recording set to round-the-clock recording by default
- German translation refined
- Traditional Chinese translation refined
- Number of Traditional Chinese characters allowed for the camera name increased
