GeoVision Security Advisory

Release Date: 2026/08/04

Advisory ID:

GV-AC-2026-08-01

CVE ID:

CVE-2026-18753, CVE-2026-18754

Affected Product:

GV-AS1620 Cloud V1.16 or earlier

GV-AS1620 ASManager V2.07 or earlier

Security Issue:

The product firmware contains an embedded, static RSA private key utilized by the Lighttpd web server for TLS termination. Exposure of this private key allows malicious actors to breach the confidentiality and integrity of HTTPS communications, enabling traffic decryption and server spoofing.

Resolution:

Reported vulnerability has been resolved with firmware update V1.17 for GV-AS1620 Cloud and V2.08 for GV-ASManager. Update firmware are available to download from GeoVision's official download page at: Link
