GeoVision Security Advisory

Release Date: 2026/08/04

Advisory ID:

GV-ASM-2026-08-01

CVE ID:

CVE-2026-18755

Affected Product:

GV-ASManager V6.3.0 or earlier

Security Issue:

A DLL hijacking vulnerability in GeoVision GV-ASManager allows a local attacker with write access to an unsafe search directory to execute arbitrary code. By placing a crafted dynamic-link library (DLL) file into the application search path prior to the legitimate library, the malicious code is loaded and executed under the security privileges of the GV-ASManager process.

Resolution:

Reported vulnerability has been resolved with GV-ASManager V6.4.0. Update is available to download from GeoVision's official download page at: Link
