

GeoVision Security Advisory

Release Date: 2026/06/17

Advisory ID:

GV-VMS-2026-06-01

CVE ID:

CVE-2026-12488

Affected Product:

GV-VMSV20.0.2 or earlier

Security Issue:

CVE-2026-12488

A memory corruption vulnerability exists in the GV-Cloud functionality of GeoVision GV-VMS V20 20.0.2. A specially crafted network request can lead to a denial of service. An attacker can impersonate the legitimate server to trigger this vulnerability.

Resolution:

Reported vulnerability is resolved with GV-VMSV20.1.0. User may visit our download page <https://www.geovision.com.tw/download/product/> or contact GeoVision Support at support@geovision.com.tw for assistance

If you have any questions or concerns in regards the cybersecurity issue, please contact our cybersecurity team: security@geovision.com.tw.
